Sectional and High speed Doors

Dun Rite Systems distributes a full line of industrial doors for every type of application. Industrial high speed doors are affordable, space-saving commercial doors and industrial doors that deliver the most value for the price. Pre-painted steel sectional doors offer all the advantages of a standard garage door, plus a higher insulation factor.

PS-400 Dock Shelter

Dock Seals and Shelters

Dun Rite Systems offers a complete range of foam and air inflatable dock seals as well as ridged, flexible and air inflatable dock shelters. All products are designed to improve safety, protect merchandise, reduce energy cost and improve security at the loading dock. The wide range of fabric materials, configurations and options allow you to build the best solution for your application.

Vehicle Restraint Systems

Dun Rite offers a wide range of mechanical and automatic vehicle restraint systems designed to improve safety and prevent accidents at the loading docks. A range of models allow you to select the proper solution for your application.

LPR35 Vehicle Restraint System

Mechanical Dock Levelers

Mechanical and Hydraulic Dock Levelers

Our mechanical and hydraulic dock levelers are designed to meet the needs of today's loading docks. The mechanical dock levelers are semi-automatic and require no manual lifting. A simple pull chain, positioned at the rear of the deck, engages and releases the dock. The hydraulic dock levelers provide superior value through prolonged, trouble-free performance.

Cantilever Gates

Offering a complete line of Ornamental Cantilever Gates that offers security, privacy in a multitude of styles to complement any setting and enhance your property. Pick a style from one of our many designs or create your own design by adding or mixing our many options. Engineering to comply with UL 325 and ASTM F-2200-02 for both safety and performance.

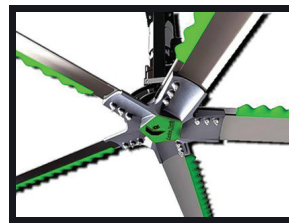

Altra-Air Fans

Altra-Air fans blanket a very large area with constantly moving air to create an expansive comfort zone.

As a result, in hot humid weather these big ceiling fans will create an evaporative cooling effect of two to four degrees Celsius throughout.

During the heating season the Altra-Air fan technology can de-stratify uneven temperatures that can be in excess of fifteen degrees Celsius from floor to ceiling. This results in significant energy savings.

Conveyors

The Modular design of our conveyor systems not only allows for ease of use, but also is highly cost effective. Our high-quality product is generally 20%-30% lower than competitors' products. Dun Rite Systems is please to offer our customers the very best in conveying technology.

– 24 Hour Service –

Dun Rite Systems offers an answer for every phase of your production line. Our unparalleled expertise allows us to provide you with an integrated solution customized to best satisfy your needs for docks, doors, gates, conveyors, fans and installations.

The Dun Rite reputation is based on innovative design in search of answers to customer needs. We are proud to have a reputation based on service excellence, providing absolute customer satisfaction.

Your loading dock equipment and doors need routine inspections, cleaning and lubrication to extend product life and maximize performance. Dun Rite Systems offers Planned Maintenance Program customized to your company's needs, based on the projected wear-and-tear on your docks and doors.

ISO 9001 Quality • Planned Maintenance

Other Loading Dock Equipment

We also provide a wide variety of other equipment to create an efficient, secure and safe loading dock environment including truck levelers, dock lifts, safety barriers, wheel chocks, dock lights and dock bumpers making Dun Rite your ideal single-source loading dock supplier with solutions to improve safety at your loading docks.
